Vantage Hearth™
by FMI PRODUCTS, LLC

MAY 2010

To: Valued Vantage Hearth Customers

From: Glenn Thomson, Sr. Vice President Sales & Marketing

Subject: Two Box Log System & Vent-Free Log Updates

Many of you have been requesting that we move to a two box log system, which allows for you and your customers to reduce inventory dollars. We are happy to announce we are in the process of doing so currently. If you review the new price lists from April, you will see we have separated the burners and the logs. You should also note in many cases we took significant list price reductions.

We have also started to introduce multiple log systems to fit onto the same burner system. This reduces your inventory dollars, but still allows you to keep ample inventory. We will be rolling the new system out in July. Should you require any product prior to that, simply advise Customer Service and we will ship in the current one box system.

Several of our new vent-free logs were introduced at the HPBA and LP shows. We wanted to keep you apprised of the status.

- The Scarlet Oak concrete logs on the Tri-Flame Burner are complete and have been added to the Vent-Free Gas Log Heaters brochure, FA #2858.
- The Mixed Oak (which is the fiber version of the Scarlet Oak with the improved ember bed) will be available in the two box system in July. It also has been added to the literature.
- The Massive Mixed Oak which is the third set to fit onto the Tri-Flame Burner System will be available in August.
- The Magniflame Burner System for the new Southern Comfort log set is being enhanced with the improvements suggested at the shows. It will be available in early August. This has also been added to the literature piece.
- The Blaze n' Glow Burner System with added ember bed is also being updated with your suggestions and will be available in August for the upcoming season.

Thank you for your feedback and your continued support.

WELCOME HOME TO WARMTH

Vent-Free Gas Log Heaters

VENT-FREE

Vantage Hearth™
by FMI PRODUCTS, LLC

Not Just Gas Logs - But Gas Log Heaters

Vantage Hearth Vent-Free Gas Log Heaters offer you what ordinary gas logs and wood cannot...the warmth, cleanliness and economy of vent-free gas space heating combined with the beauty and convenience of gas logs.

Flex lines come standard with ALL vent-free gas log heaters to simplify installation.

The Beauty of a wood fire - with none of the work

Nothing compares to the warmth and the charm of an open fire in the fireplace. Through its engineering, Vantage Hearth has created logs that beautifully duplicate real wood, a coal bed with a deep comforting glow, and a flame that dances and flickers like a wood fire. You won't be able to tell the difference.

The Convenience of Gas – Flames with a flip of the switch

While nothing compares to the charm of having a fire in the fireplace, there is little joy in the time and mess of making a regular wood fire and cleaning up the ashes afterwards. Select Vantage Hearth Vent-Free Gas Log Heaters even have optional thermostatic remote controls for maximum comfort and convenience.

Efficiency of Vent-Free – Heat your home for less

Vantage Hearth's unique, clean burning design provide 99% heating efficiency, allowing you to operate the logs vent-free with the fireplace damper closed. With no venting required, there is no heat loss up the chimney. Plus heating with Vantage Hearth Gas logs means you'll never again be left in the cold with wet logs or without heat during a power outage.

Ordinary vented gas logs operate at approximately one third the efficiency and twice the costs, requiring the damper to be open, allowing beneficial heat to escape. When it comes to real comfort, efficiency and savings-Vantage Hearth's Vent-Free Gas Log Heaters leave ordinary gas logs in the cold.

Scarlet Oak / Mixed Oak
Massive Mixed Oak

Scarlet Oak Log Set

Mixed Oak Log Set

The Scarlet Oak & Mixed Oak log lines bring a remarkable new technology to the field of vent-free gas logs. To duplicate the look of a real wood fire, these models include a glowing, coal bed at its base. The bright, glowing coals and flickering embers are achieved through the use of two unique technologies. Scarlet Oak & Mixed Oak models boast a triple burner for greater fire and light: two burners of bright yellow flame, plus the front burner for the glowing ember bed.

LogMate™ Fireboxes: The Perfect Spot For Your Vantage Hearth Gas Log Heater

LogMate™ Fireboxes allow you to enjoy the beauty of a fireplace along with the warmth and efficiency of a vent-free gas space heater. All standard LogMate Fireboxes are offered in two styles: The heat circulating models feature louvers and can be fitted with an optional blower; the smooth faced non-circulating models are ideal for custom trim applications such as stone or marble.

Smokey Mountain Oak & Rocky Mountain Oak

Vantage Hearth's Smokey Mountain Oak & Rocky Mountain Oak Vent-Free Gas Log Heaters feature a unique slanted burner system that offers the most glow and realistic yellow flames in the industry. Multi-log ceramic fiber and refractory concrete designs are available in 18'', 24'', 30" and 36'' models with variable manual, remote "ready" or thermostat controls.

Smokey Mountain Log Set

Rocky Mountain Log Set

Featuring The Vantage Hearth "Auto-Light" Easy Ignition System

Vantage Hearth brings to its gas log heaters the ultimate in convenient ignition. The "Auto-Light" Easy Ignition System is simply a battery-powered continuous spark system that lights the log's burner faster and easier. One push of the button is all it takes. (You see this feature on many higher-end gas barbecue grills nowadays.) The single AAA battery is easily accessed from the front left side of the log set. This breakthrough in convenience is found on Vantage Hearth's Smokey Mountain Oak & Rocky Mountain Oak Vent-Free Gas Log Heaters.

The Vantage Hearth Difference

- ***Technology leaders.*** *Vantage Hearth has a history of technical and aesthetic innovation with vent-free gas logs – a history that we continue today.*
- ***Safety engineering.*** *We thoroughly test our products to all applicable standards for combustion efficiency and indoor air quality.*
- ***Full choice for you.*** *Vantage Hearth offers vent-free gas log heaters in a full range of sizes – 18'', 24'', 30'' and 36'' – as well as models for two-sided see-through fireplaces.*

Which Vantage Hearth Model Is Right For You?

Vantage Hearth offers the broadest line of vent-free gas log heaters in the industry featuring a variety of styles and sizes plus your choice of three types of controls. Just follow the easy steps below to choose a great looking set of Vantage Hearth gas logs.

1. Installation Considerations. *Vantage Hearth Vent-Free Gas Log Heaters install in any masonry or manufactured solid fuel-burning fireplace. They can also be installed in any ANSI Z21.11 certified vent-free universal firebox including the Vantage Hearth LogMate™ Fireboxes. All Log Heaters with variable manual controls including remote ready are also listed to the ANSI Z21.60 Vented Log Decorative Standard which requires the GA6080 damper clamp accessory. All Vantage Hearth Vent-Free Gas Log Heaters are offered in both propane and natural gas models. Gas connection for all models is 1/2" NPT. If a remote control wall switch or wall thermostat is installed, some wiring will be necessary.*

2. Control Choices. *Vantage Hearth Gas Log Heaters are available in variable manually, thermostatically or remote controlled models. All offer easy, reliable and economical heating as well as a "matchless" piezo ignition system.*

- ***Variable Manually Controlled Models – Select the Heat Setting You Prefer.*** *Vanguard's Log Heaters featuring a variable manual control allow you to select the heat setting and flame height you desire by simply turning a control knob. Enjoy flames and glowing coals from both burners (where applicable) – even on the lowest setting!*
- ***Ember-Stat®Thermostatically Controlled Models Provide Heat... Automatically.*** *Ember-Stat logs are the only gas logs to offer a thermostat control that gradually modulates the heat output and flame height from high to lower settings, or pilot, in order to maintain a consistent room temperature. Even at the lowest setting you enjoy glowing coals and realistic flames from two burners.*
- ***Remote Controlled Models - Offer you heat at the push of a button.*** *Just light Vantage Hearth's Remote Control Ready Gas Log Heaters and operate with the manual variable controls or your choice of four remotes.*
  - *The Wall Mount Off/On Switch will enable you to turn your log set from pilot to on at the flip of a switch.*
  - *With a Wall Mount Thermostat Switch set the wall thermostat at the comfort level you desire and the log heater will automatically cycle from pilot to the heat setting selected.*
  - *The Hand-Held On/Off Remote Control enables you to turn the log heater off or on using the hand-held control. A child safety lock feature is included for additional safety assurance.*

- *The Hand-Held Thermostat Remote Control allows you to view the time and room temperature or operate the log heater in a manually or automatically (thermostat) controlled mode plus you can turn it off or on without ever leaving the comfort of your easy chair! Note, the log heater will always operate at the heat setting (and flame height) selected unless it is manually changed. A child safety lock feature is included for additional safety assurance.*

3. Style Choices. *Vantage Hearth Gas Log Heaters are available in a variety of styles. The ChaRealistic Char-glow and Real Burn designs feature realistic flames plus glowing coals from two burners. The Flame-Max design features generous dancing yellow flames and is available in multi-sided, dual and single burner models.*

4. Size Choices. *Vantage Hearth Vent-Free Gas Log Heaters are available in 18", 24", 30" and 36" sizes. For sizing and product dimensions, please refer to the product owners manual.*

5. Fireplace Hoods (If required).

A fireplace hood accessory may be required to deflect heat away from your mantel shelf. Fits fireplace openings from 28" to 48" wide. Installs easily with glass doors or to the lintel of the fireplace opening. Refer to owners manual for more details.

6. Decorative Ash Bed / Control Cover Accessory Kit (Optional).

This new accessory is not only functional but beautiful as well! The set includes five log pieces featuring realistic bark, split and charred areas plus a matching control cover. Simply move the cover when you need to use the control(s).

Safety Features Built Into Every Fireplace

Vantage Hearth's Vent-Free Gas Log Heaters are designed certified by PFS Corporation and meet or exceed all regulations and safety performance standards for vent-free gas appliances. Additionally, this heater performs well within nationally recognized guidelines for indoor air quality.

The dual purpose safety pilot system protects against oxygen depletion and any interruption in the fuel supply. If either occurs, it shuts off the gas flow to the burner turning the heater off. An internal pressure regulator controls fluctuations in your gas pressure. These features ensure clean and reliable heat without the worry and inconvenience of vented gas logs or burning wood.

Vantage Hearth Vent-Free Gas Products Meet or Exceed Nationally Recognized Standards/Guidelines for Indoor Air Quality.

IMPORTANT

Installation must be done by qualified service persons.
Read Owner's Manual before using.
Check local codes and ordinances for permitted uses.
Vent-free gas products are prohibited for bedroom and bathroom installation in Massachusetts.
All products approved for manufactured (mobile) home installation.
We reserve the right to amend product specifications without notice.
Operating heater at very high elevations could cause nuisance outages.
Use with adequate air (ventilation) only. Humidifies while it heats. Provides water vapor in the area heated. Refer to owner's manual for specifics.
Product cannot be converted between fuel types.
The only warranty we offer is our standard warranty. Please read the warranty for any limitations or disclaimers.
All parts have a limited four year warranty.
Stainless Steel burners carry a limited five year warranty.
All accessories have a one year warranty.
